Work History

Senior Backend Engineer — CloudScale Systems
2022-04 – Present
• Developed high-throughput microservices using Go and deployed containerised pods via Docker.
• Led team transition to modern Git branching workflows and automated CI pipelines.
• Supported company go-to-market initiatives with reliable cloud APIs.

Frontend Developer — WebSphere Digital
2019-08 – 2022-03
• Built dynamic, responsive user portals with React and modular JS components.
• Reduced client-side bundle size by 35% through effective code splitting.
